BEFORE YOU APPLY

HOW TO GET THE MOST OUT OF THIS

1. START WITH LIST 1 THIS WEEK

These need nothing but a company email, a website and, for some, a company that's under a certain age or funding level. Most take ten minutes.

2. CHECK YOUR BANK

If you bank with Brex, Mercury or Ramp, log in and open the perks page. Many deals only show once you're signed in.

3. ASK YOUR INVESTOR OR ACCELERATOR

If you have backing, ask for their perks list and referral links. Lots of list 1 perks get much bigger with a partner: AWS Activate goes from $1,000 to as much as $200,000 through an Activate Provider, and HubSpot goes up to 90% off through an approved partner.

4. MIND THE CLOCK

Some credits expire after 12 months, and Mixpanel asks you to start using it within 90 days. Apply when you're ready to build, not months before.
